CherryPlast

Bag placing

The CherryPlast has been developed for the cherry industry and rapidly places pre-made bags into boxes. When packaging fruit, your goals are clear: achieving a longer shelf life and ensuring minimal product damage. This automation helps you reach those goals.

While optimized for the cherry sector, the machine also performs exceptionally well with other delicate fruits such as kiwis. Its compact design and dual bag magazine enables continuous 24/7 production without downtime. With a large bag capacity and a convenient recipe structure, switching between different box sizes is quick and effortless.

**Looking to seal your bags automatically too? Check out the CherrySeal.*

Our world

We are Niverplast, a Dutch packaging company changing the industry with automation and innovation. With a focus on bag-in-box enclosures, we ensure every product, from bread to meat, is packed with precision and care. Our durable machines work perfectly with our EasyOpen bags for efficient operations.

We believe happy colleagues create happy customers. We care about our team's well-being, ensuring great service and continuous improvement. And we won't stop until you say, "That's exactly what I needed."
